

Data table for Quickstats: Percentage of Residential Care Communities\* That Use Electronic Health Records, by Community Bed Size — United States, 2018, 2020, and 2022¶

| Number of beds                   | 2018    |                          |         | 2020                     |         |                          | 2022 |  |  |
|----------------------------------|---------|--------------------------|---------|--------------------------|---------|--------------------------|------|--|--|
|                                  | Percent | 95% confidence intervals | Percent | 95% confidence intervals | Percent | 95% confidence intervals |      |  |  |
| All residential care communities | 36      | 31.38 40.30              | 41      | 38.98 42.38              | 48      | 37.06 58.95              |      |  |  |
| 4–50 beds                        | 26      | 20.69 31.59              | 28      | 25.57 29.65              | 35      | 21.15 51.25              |      |  |  |
| > 50 beds                        | 64      | 56.55 70.98              | 72      | 68.91 74.82              | 80      | 75.69 83.64              |      |  |  |

\* Residential care communities are state-regulated, have four or more beds, provide room and board with at least two meals a day, and are staffed to provide supervision and assistance with personal care and health-related services to adults who cannot live independently but do not require intensive nursing care.

¶ Residential care communities with missing data were excluded.
